

HOW TO CREATE YOUR OWN PLAYLIST

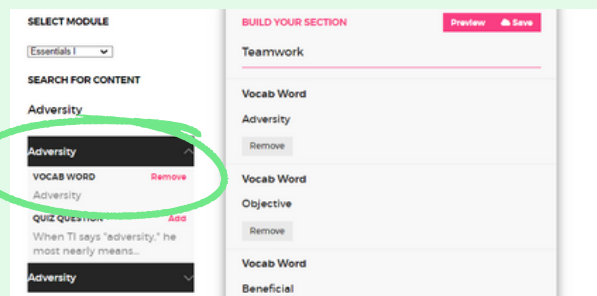

1 Log in as a teacher or administrator. In the navigation panel on the left, go to 'Browse Content'.

2 From here, you can view all of the content available to you from the perspective of a student by clicking on a unit and then clicking "Preview" at the top of the page.

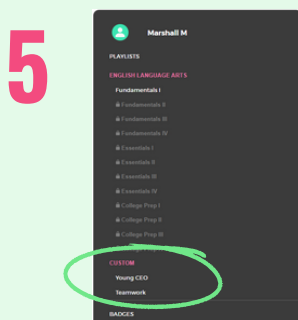

3 You can also create your own custom EPs by clicking on the yellow 'Custom Section' button at the end of any module list.

4 Using the dropdown menu, you can select any module to pull words from, then click on a word* and add it to your EP. You'll need to add a total of 5 words, and then give it a title and save.

**Only add the vocab word (not the quiz question below) for your custom playlist to work as intended.*

5 You can click Preview to go through the EP as a student, and the students in your classroom will be able to view your new custom EP in the Custom section in their navigation panel underneath the standard ELA modules.
